The teams with the best record in pool play will advance to the Final Games

All ties will be decided by the following rule - if head to head can not break the tie.

### Computing the Runs-Allowed Ratio

For each team involved in a tie, calculate: The total number of runs given up in all pool play games, divided by the number of half-innings played on defense by that team in those games. This provides the number of runs given up per half-inning by that team: the Runs-Allowed Ratio.
